-----------------------------	---------

Fan warranty

For our Lucci Air and Fanaway ceiling fans, we offer a generous 2-year in-home warranty along with a 7-year motor replacement warranty, ensuring long-term reliability.

Plus, when a Lucci Air or Fanaway ceiling fan is purchased or installed by a Beacon Trade member, we'll extend the in-home warranty by an extra year - that's 3 years of coverage!

For our Bayside ceiling fans, enjoy a 2-year in-home warranty plus an additional 4-year parts replacement warranty, so you can stay cool and confident in your purchase.

Australian designed

Our ceiling fans are designed in Australia, ensuring they meet the highest standards of quality, safety, and performance.

Each fan combines modern aesthetics with cutting-edge technology to enhance comfort and style in any space.

IP-rated fans

Our three ranges of IP-rated fans are engineered to excel in any outdoor or challenging environment.

Designed to resist dust and water ingress, these fans are ideal for industrial spaces, outdoor areas, or moisture-prone zones like kitchens and bathrooms. Enjoy peace of mind and outstanding performance, no matter where they are needed.

Get smart with Lucci CONNECT

With our smart module, remote and the Lucci Connect app, controlling the fan is a breeze.

Many of our fans feature the ability to connect a smart module or receiver, allowing for simple control. From a phone, you can easily turn it on or off, adjust the speed, set timers, and even create schedules based on the weather.

DC FANS

Using the Lucci Connect DC module, app or voice control, convenience and customisation are at your fingertips.

You can effortlessly control the fan with a smart-phone or a voice command, managing power, speed, timers, and even crafting personalised schedules based on outdoor temperatures.

The Lucci Connect app seamlessly integrates with the fan, offering complete control. Plus, the fan can still be used with the traditional remote control.

AC FANS

To make an existing AC fan smart, use the Lucci Connect smart remote kit.

It's an easy-to-install solution that transforms an AC fan into a smart device. Once connected, gain access to a range of features, including remote control, scheduling, and voice command functionality. This upgrade enhances both convenience and energy efficiency, offering a smart home experience.

Fans with lights

Almost all of our fans with lights now use GX53 globes instead of integrated LED lights, offering more versatility.

If the light ever needs replacing, you can simply swap out the globe without having to change the entire fan. Our GX53 globes are 3-step dimmable via the switch and come in both warm white and cool white to suit any lighting preference. Plus, for those who love smart features, we offer a Lucci Connect GX53 option in the 200mm size, making it even easier to customise your lighting experience.

AC vs DC motors

We offer a wide range of ceiling fans with both AC and DC motors to suit various preferences and needs.

AC motors are the traditional choice, known for their reliability and affordability, but they tend to consume more energy. In contrast, DC motors are more energy-efficient, quieter, and offer smoother speed control, making them a premium option for those seeking more from their ceiling fan.

Rooms & fan sizes

The size of a ceiling fan is crucial for effectively circulating air in a room.

A fan that's too small for the space may not provide adequate airflow, leaving the room feeling stuffy, while a fan that's too large can create an overpowering breeze and disrupt comfort. Properly matching the fan size to the room size ensures optimal airflow, comfort, and energy efficiency. Here are some guide lines to help pick the perfect fan for your space:

BEDROOMS:	91cm - 122cm
LIVING SPACES:	122cm - 154cm
LARGE SPACES:	142cm - 254cm
ALL SPACES:	122cm - 132cm

Close to ceiling (CTC) fans

For homes with low ceilings it is essential to use a close to ceiling (CTC) fan. This makes the space safer for everyone in the house and makes it appear less cluttered and more open.

Indoor

Suitable for indoor use only.
